

## Centricity Practice Solution: Practice Management Module

In the face of shifting regulations and payment reform, your practice needs software solutions that drive operational efficiency, facilitate care coordination and help limit financial disruptions as you lead your practice through industry change.

Centricity Practice Solution's Practice Management (PM) module easily schedules single appointments or entire calendars, streamlines collections and billing, and leverages important demographic data to help providers deliver more thorough care. Through its customizable processes, ability to interoperate with other systems and progressive technologies that meet evolving industry demands, the PM module can help you optimize productivity to keep your practice at the forefront of care delivery.

### Connect productivity with care

Centricity Practice Solution's PM module enables you to practice your own way, strengthens clinical and financial performance and helps you tackle industry change head on.

- **Exceptionally customizable** to your needs and existing workflows.
- **Seamlessly interoperable** with virtually any EMR system and other HIT platforms.
- **Truly progressive** features that help support ICD-10, PCMH and ACO initiatives.

The PM module offers a number of benefits tailored to the unique and emerging needs of your ambulatory practice.

**Run your practice the way you want, to best serve your patients and priorities:**

- Patient registration is made easy by accepting a variety of data entry options as well as tools to help reduce staff workload and data-entry error.
- Scheduling is transformed into a quick and simple process that offers a flexible interface and allows for custom scheduling guidelines.
- Integrated task management capabilities give staff instant access to interactive, self-updating claims worklists to easily track reimbursement delays and target known problem claims. This tasking offers prioritization, payment reviews and reporting functions.
- A customizable financial dashboard displays metrics based on key performance indicators and real-time data, and balances to core reports.

**Achieve new levels of efficiency with seamless integration:**

- The PM module builds efficiencies by connecting with other systems including direct integration with Centricity Practice Solution's EMR module or your chosen EMR system.
- Centricity EDI enables scheduling-to-payment workflow that electronically connects with virtually any payer, while fully integrating eligibility, claim, and remittance data right into your workflow. Near-100% electronic posting of payment information helps reduce A/R days.
- Document Manager enables your practice to easily manage and store documents and faxes, freeing up resources to help increase practice productivity.
- From scheduling appointments and registering to filling out insurance forms and creating customized payment plans, Centricity Patient Portal brings together a broad range of easy-to-use self-service tools that help patients play an active role. Tight integration with Centricity Practice Solution enhances administrative efficiencies.

**Prepare for reforms and tackle industry change head on:**

- A dynamic search engine helps providers identify diagnostic trends and maps ICD-9 codes to pre-loaded ICD-10 codes to enable early exposure to ease practice transition while minimizing disruption.
- Solutions help you address healthcare reforms by enabling you to improve patient access to care and proactively reaching patients in need of preventive services, chronic care or follow-up services. Analytics tools help you to measure and improve practice performance.
- The optional Hosted Claims Manager module within Centricity EDI helps reduce the clinical denial rate by comparing against more than 4 million clinical edits, while automated electronic payments help reduce A/R days.

**Virginia Women's Center**

Virginia Women's Center experienced a 19% growth in profitability, supported by the flexibility in Centricity Practice Solution.
