ViewPoint 6
Ultrasound PACS and Reporting Solutions

Designed for Maternal Fetal Medicine
As an expert in Maternal Fetal Medicine you need to thoroughly track, document, and archive all your fetal measurements and images. ViewPoint* 6 can help make your workflow easy, fast, and simple.

Advanced Image Review - Designed for Ultrasound
A clearly laid out image viewer helps you manage all the images you send from your ultrasound systems in one place, whether you send 5 or 500 images each day. The ViewPoint 6 image viewer allows you to:

- Easily access and compare images from a past study
- Utilize advanced image tools to aid in diagnosis:
  - Auto play clips
  - Measure and annotate
  - Rearrange images
  - Post-process volumes using integrated 4D View, including TUI, STIC†, SonoNT, SonoAVC*, V-SRI†, and HDlive*†
- Store measurements

The ViewPoint 6 image viewer allows you to review images, clips, and volumes from a study in one place.

Professional Reporting Simplified
Your ultrasound reports can include everything from images and measurements to results and recommendations. ViewPoint 6 can help you create comprehensive and easy to read reports in less time.

- Use ViewPoint 6 to help reduce manual data entry and eliminate paper worksheets with automated measurement transfer
- Apply quick report templates for efficient reporting
- Choose from over 400 graphs to trend data
- Customize forms, fields, and reports to your preference
- Easily add images and graphs to complete your report

View patient information, exam data, and images all in one view.

1 – Available if licensed on the ultrasound system
To support you in your daily routine, ViewPoint 6 comes with a wide variety of reports, based on national and international guidelines.

**Ob/Gyn Expert Reporting includes:**
