

# Centricity Practice Solution For Orthopedic Practices

## Optimize the performance of your orthopedic practice

Orthopedic healthcare practices face a range of regulatory and reimbursement pressures. Centricity\* Practice Solution is designed with the flexibility you need to manage your practice the way you want. Whether you use the system as a fully integrated Electronic Medical Record (EMR) and Practice Management (PM) solution that shares a single database, or configure it to function as a standalone EMR or PM system, Centricity Practice Solution helps you save time, increase clinical productivity, and optimize financial performance.

## Practicing medicine the way you want

Centricity Practice Solution, GE Healthcare's integrated EMR and Practice Management solution, enables your ambulatory orthopedic practice to connect productivity with care.

- **Exceptional customizability** empowers your staff by giving them the ability to tailor the solution to meet your practice's needs and preferences enabling you to amplify your clinical and financial productivity
- **Seamless interoperability**, supported by a uniform clinical architecture, automatically pushes data to where you want it so providers don't waste time searching for information.
- **Progressive technologies** including an ICD-9 to ICD-10 crosswalk and a Meaningful Use toolkit with orthopedic-specific quality measures help you lead your practice through industry change.

"Today, the staff can easily handle 50 patients per provider and be finished by 5 p.m. 18% of our growth in patient volume is directly attributable to Centricity Practice Solution."

### Hilary Bias

*System Administrator*

Kansas City Bone & Joint Clinic

Overland Park, KS

## AMPLIFY YOUR CLINICAL AND FINANCIAL PRODUCTIVITY TODAY AND TOMORROW

### Customizable: Tailor the system to work the way you do

No two orthopedic practices are the same. To increase productivity and physician satisfaction, Centricity Practice Solution can be tailored to your providers' unique workflows, EMR experience level, and preferences. With the ability to choose pre-built orthopedic forms or design your own, enter structured data in a variety of ways, and document by exception, your providers can quickly review relevant data and efficiently chart the way they choose.

### Interoperable: Bring data to providers with seamless efficiency

Your clinicians' time is valuable. Through the power of Centricity Practice Solution's interoperability and database structure, you can effectively aggregate information from disparate sources for a more comprehensive clinical profile, helping you to increase efficiency and enhance clinical decision-making. Once information is in the system, it is pushed to where it needs to be based on your predetermined preferences, so providers don't have to search for it.

Providers can access your PACS system—regardless of vendor—from within Centricity EMR module without the need for a separate login, enabling quick information review and documentation.

### Progressive: Manage regulatory change while limiting the impact on your business

Change is coming, and we're here to help. Centricity Practice Solution was built with progressive technologies to help you elevate performance and tackle industry challenges. Predictive problem search and the ICD-9 to ICD-10 crosswalk help you ease the transition and minimize reimbursement delays, while SimpleChart expedites charting by enabling providers to document with a single command. In addition, the Meaningful Use toolkit with orthopedic quality measures helps you successfully prepare for attestation.

### An implementation approach designed for you

Experience matters. Our implementation staff has on average over 10 years experience delivering successful implementations. GE Healthcare's expertise and consultative approach enable us to develop and execute a plan that is efficient, effective, and customized for your needs.

### Built for the future

GE Healthcare is committed to helping your orthopedic practice save time, increase clinical efficiency, and adapt to regulatory changes. With progressive technology that is customizable and interoperable, Centricity Practice Solution can help you connect productivity with care.

### 90-day sprint

With the 2012 Summer Olympics in London fast approaching, the United States Olympic Committee knew they needed a partner they could trust to execute their EMR implementation quickly and effectively. From the time the USOC selected Centricity Practice Solution to the time they went live was a record-breaking 90 days.

"We have a lot of pressure on us to have this EMR in place for the first time at an Olympic games in London. GE has kept the pace with us. They've been great partners to help us be quick and efficient in the installation."

### Dr. Bill Moreau

Managing Director of Sports Medicine  
United States Olympic Committee  
Colorado Springs, CO
